

# Wyoming SPDG/SSIP

Data-Based  
Decision Making

## Data-Based Individualization

Data-Based Individualization (DBI) is a systematic method for using data to determine when and how to provide more intensive intervention.

Throughout the DBI process, the teacher collects daily/weekly data about the intervention and the student's progress and makes changes accordingly.

## Evaluations

Multiple evaluations to collect data on teacher implementation/skills and student outcomes

### End-of-Training Questionnaires

State Test Data

Benchmark Data

Phone Interviews

DBI Implementation Checklist  
Completed twice a year

Observational Checklist for High Quality  
Professional Development

Weekly Implementation Log  
Completed on each student in DBI

## Results Across 2017-18 and 2018-19

Dashboards summarizing all evaluations and detailed reports on each evaluation are generated.

### Participants/Trainings

**214** Unique participants

**13** Trainings

**26** Average number of participants  
per training.

### Weekly Log

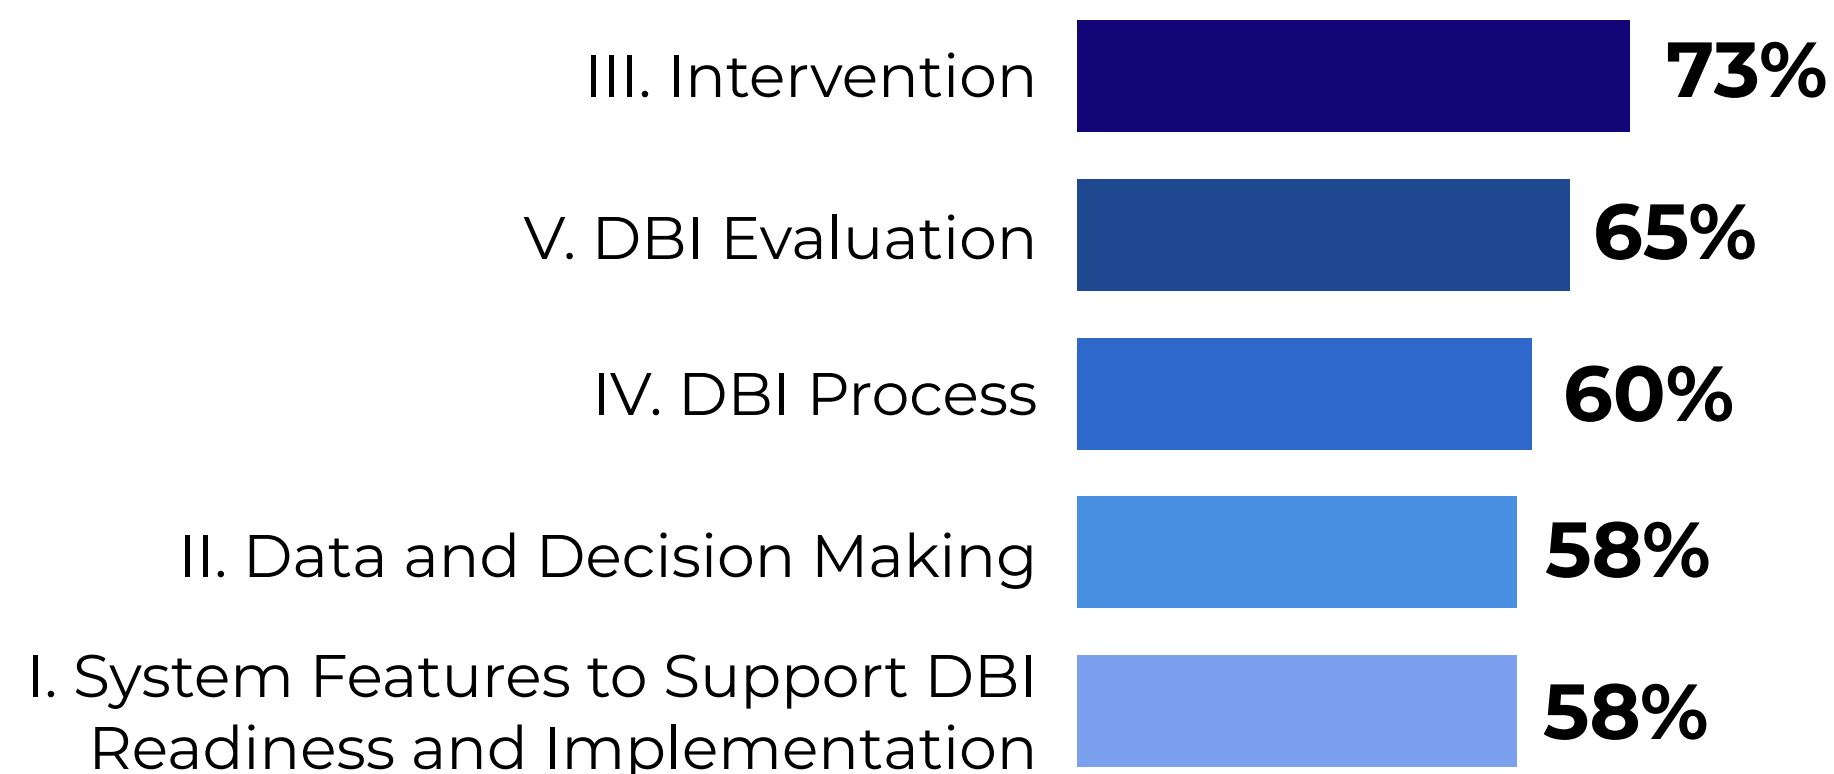

**11** Average weeks tracked per  
student

**39** Teachers

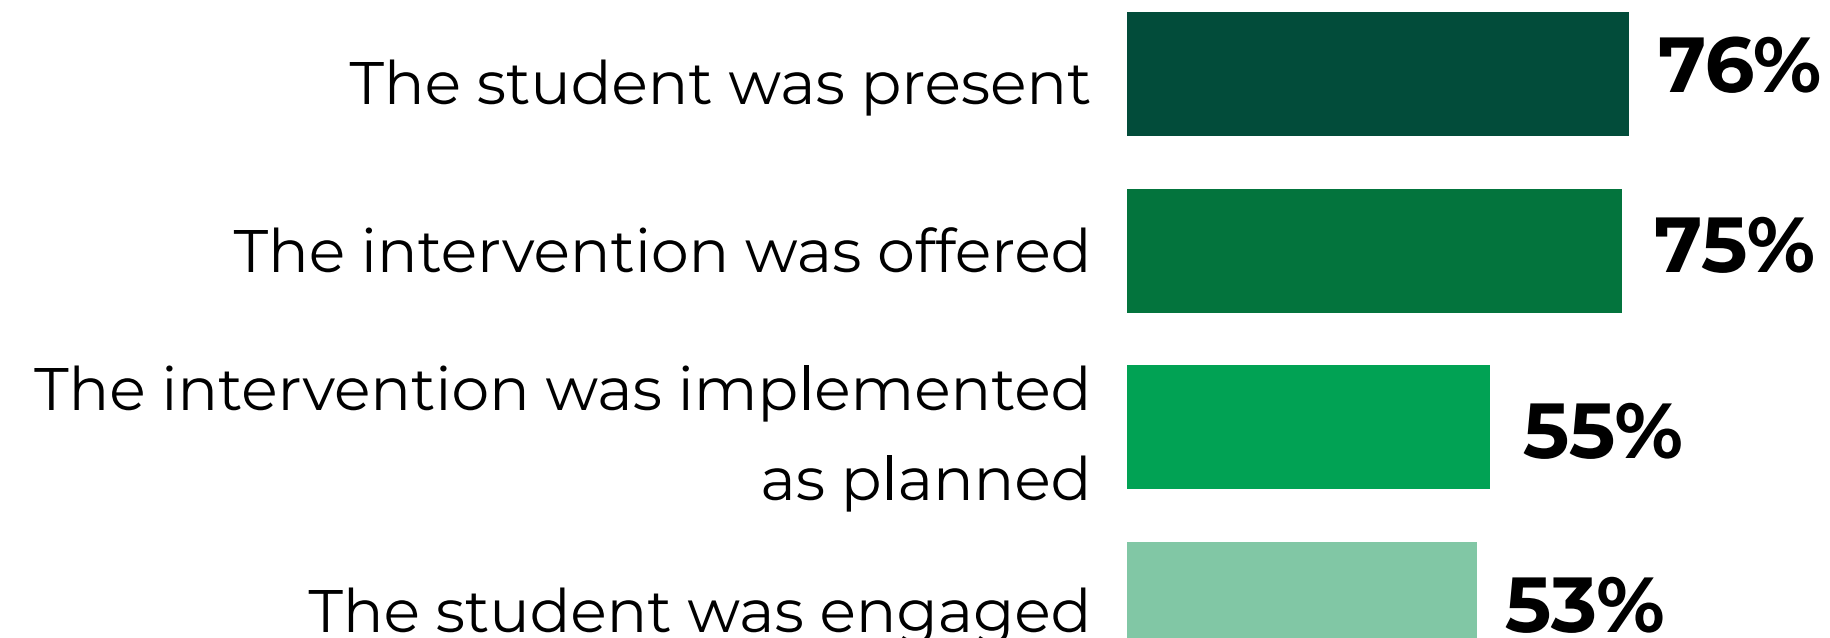

**62** Students

**669** Unique Student-Weekly Records

### Percent of points earned on DBI Implementation Checklist after attending trainings:

### Percent of records with an occurrence of 3-5 times per week:
