

# Wyoming SPDG/SSIP 2019-20 DBI Schools

## Data-Based Individualization

Data-Based Individualization (DBI) is a systematic method for using data to determine when and how to provide more intensive intervention. Throughout the DBI process, the teacher collects daily/weekly data about the intervention and the student's progress and makes changes accordingly. Dashboards summarizing all evaluations and detailed reports on each evaluation are generated.

24 schools from one district participated in DBI in 2019-20.

## 2019-20 Results

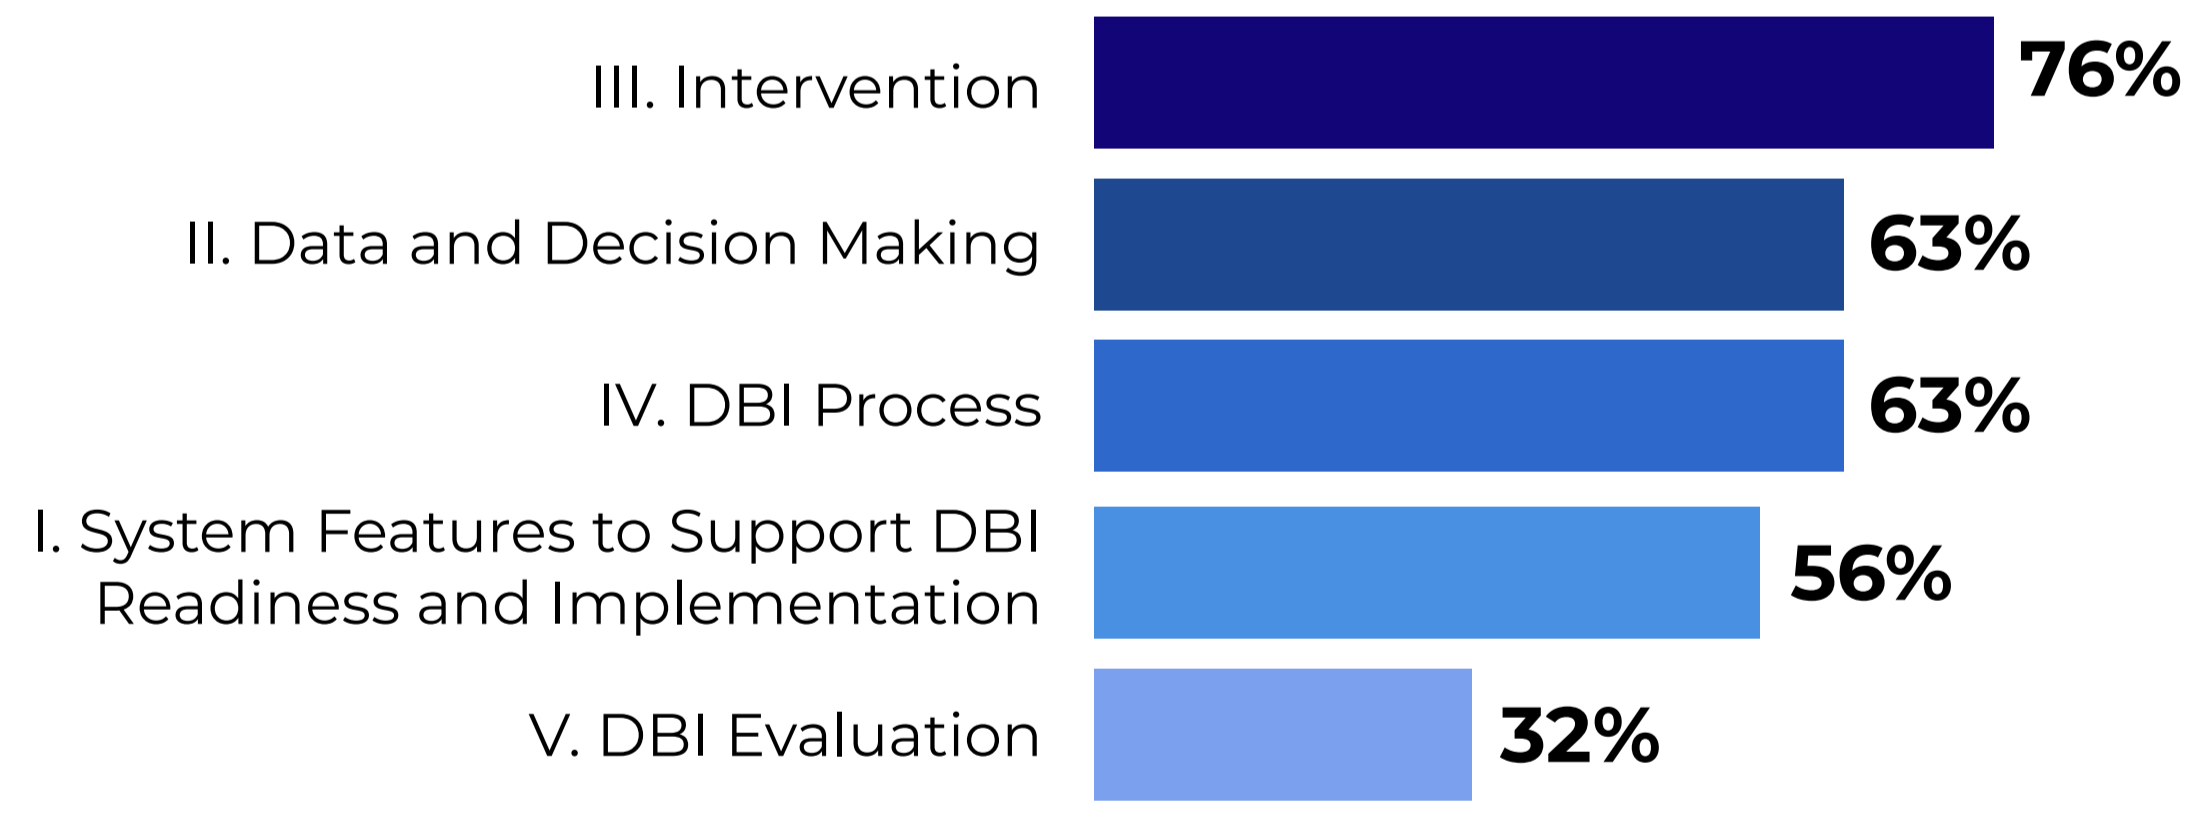

### End-of-Year Survey

- 92%** % of students who improved at least "Somewhat" from the start of intervention
- 90%** % of students for whom DBI was at least "Somewhat" successful
- 92%** % of students whose progress monitoring scores increased

### Weekly Log

- 26** Average weeks tracked per student
- 30** Teachers
- 72** Students
- 730** Unique Student-Weekly Records

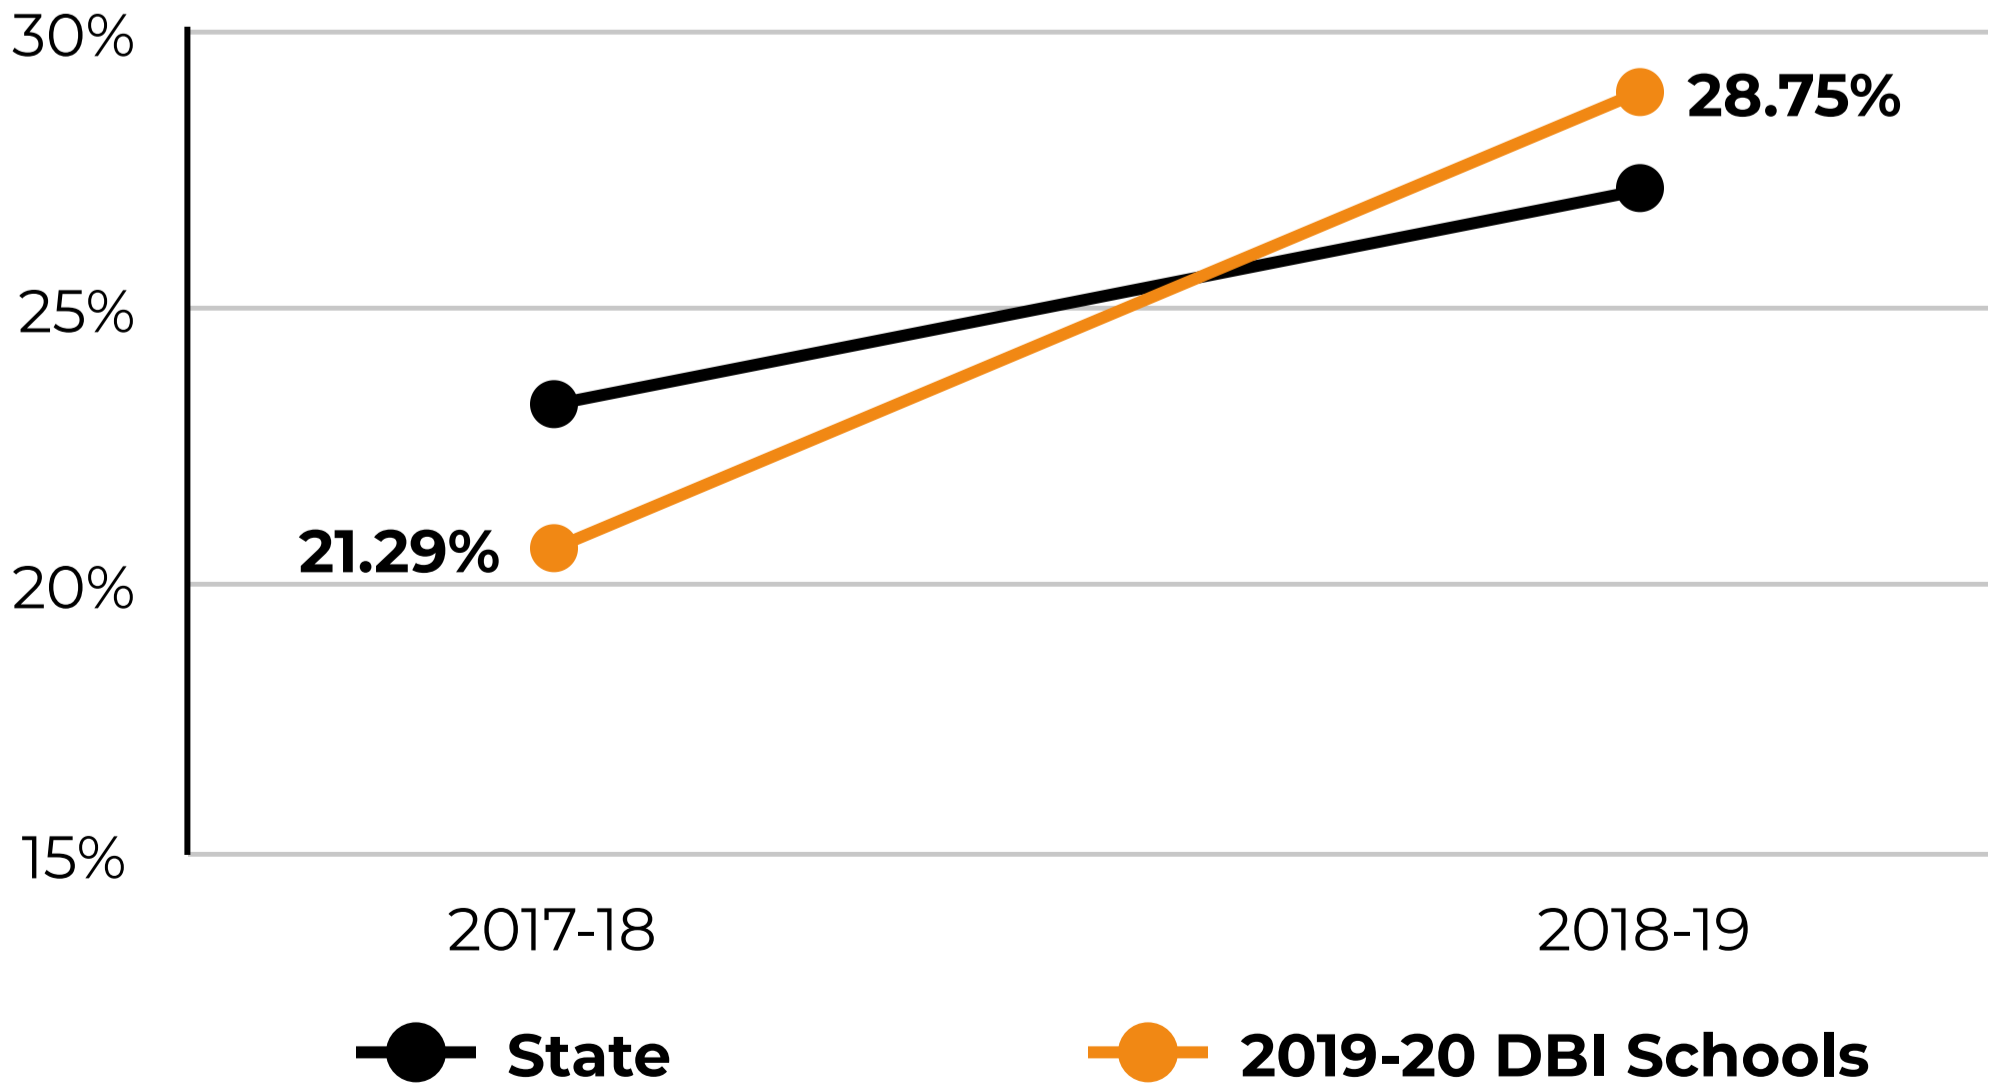

### Percent of points earned on DBI Implementation Checklist after attending trainings:

### Percent of records with an occurrence of 3-5 times per week:

### Percent of Grade 3 SWD Scoring Proficient on WYTOPP Reading Test

### Percent of Grade 3 SWD Scoring Below Basic on WYTOPP Reading Test
